

MORE LASTS FOR MORE FEET

The last determines the dimension, volume, and size of a piece of footwear. Shimano makes its own lasts, upgrades them every year, and offers the widest range of lasts of any cycling shoe manufacturer. The Shimano shoe line-up includes Women's, Wide, and Volume+ models, with extended sizing up to European 52. More lasts means a better fit for a wider range of foot shapes.

LAST			A	B	C	WIDTH	MODEL
SHIAMNO DYNALAST	DYNALAST is an anatomically curved last that eliminates angles and conforms better to the natural contours of your foot. The heel sits deeper in the shoe and the fit is snug and close to the foot. Fewer gaps plus a better fit equals longer, faster, and more comfortable rides.
